

Adaptor Plate

Instrumentation – Refractometer Measurement

General Information

Customer: Liquid Solid Control, USA
Product: Adaptor Plate
Application: Measurement Device for HCl
Install Date: 2006

Problem

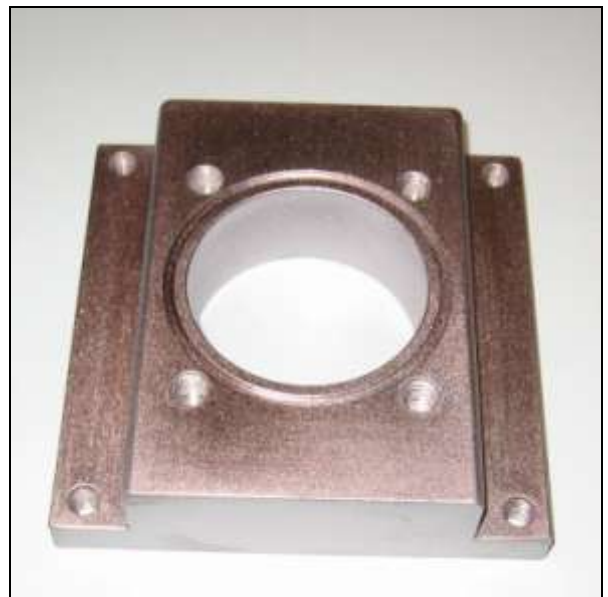

Liquid Solid Control supplies solutions to customers whose needs vary and require a variety of specialty metal solutions. It is difficult to maintain a diversified supply chain of various metal solutions like titanium, nickel alloys and zirconium. In order to win customer orders and control inventories Liquid Solid Controls needs a universal metal solution that could be used in nearly any media.

Solution

A **Tantaline JobShop** solution was introduced consisting of a steel base core and a 100% tantalum surface.

Result

The Tantaline solution has enabled Liquid Solid Control to offer a universal solution to the market while minimizing any specialty metal inventories.
